DETAILED ACTION

Election/Restriction

1. Newly submitted claims 45-53 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the specific thermal coefficient expansion of the core/spool was not originally presented.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 45-53 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, lines 8-9, there is no antecedent basis for "said two longitudinal end corners of the core assembly." Claims 2-3 inherit the defects of the parent claim.

Art Unit: 2832

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

5. Claims 1-2, as best understood in view of the rejections under 112 second paragraph, are rejected under 35 U.S.C. 102(e) as being anticipated by Fukaya et al. [JP 4-144218]

Fukaya et al. discloses an ignition coil [figure 4] comprising:

- a central core assembly [11-13] having longitudinal end corners;
- primary and secondary spools [23, 24];
- primary and secondary coils [21 and 22];
- resin material [see figure 4] surrounding the core; and
- a buffer member [31a, 31b] covering at least one end of the core assembly and having an

additional portion overlying the core end.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the integrated primary spool with the buffer for the purpose of simplifying assembly and reducing parts.

Allowable Subject Matter

6. Claim 3 is would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
